1. Note

This manual includes important safety, performance and service information. Please make sure you have read the following warnings before you use our product for the first time.

- a) If you lend your electric bicycle to other people, please let the user read this manual, it could be helpful to decrease the risk of accident.
- b) Please wear a suitable and safe helmet when riding, please wear clothes with fluorescent and reflective stripes when you ride at night. Don't exceed the speed limits, it is a main reason for traffic accidents, please make sure you follow the traffic rules.
- c) Don't touch the charging port on the bike, or use metal to touch it. Otherwise it will cause a short circuit.
- d) Starting the bike using the throttle, frequent braking, riding against the wind, carrying people or anything when the tire pressure is insufficient, insufficient air pressure in the tires in general. All of these will consume a lot of electric energy, and therefore reduce the distance you can go. To extend the range:
 - 1. Use power assist mode.
 - 2. Brake only when necessary for your safety and don't start from zero using the throttle.
 - 3. Don't overload the bicycle.
 - 4. Before riding, please check the pressure of the tire and supply enough pressure.
- e) When charging the e-bike make sure that there is no foreign matter in the charging port. Firstly connect the charger to the e-bike and then connect to the AC power supply to prevent sparking.
- f) Don't expose the e-bike to direct sunlight or rain for an extended period of time, and avoid storing it in places with high temperatures or corrosive gas, so as to avoid chemical corrosion and damage to the electronic parts and painted surfaces, which may lead to operational failure and accident.
- g) It's better to turn off the power button when you haven't ridden it for a long time, or else the battery will be drained, which will damage it. Please keep it fully charged before you stop riding it for a long time.
- h) Your current insurance may not cover situations you may encounter when riding an electric bike, please contact your insurance company or insurance broker for an appropriate consultation.
- i) According to the law, people must reach the age of 16 to ride e-bikes or three-wheeled electric bikes. Please refer to the local laws and regulations when using this product in other countries.
- j) Bicycles are vehicles with certain risks, please make sure to follow the traffic rules. Also when emergency braking, brake the rear wheel first, and only then the front wheel, especially if the cycling speed is too high. If the front brake is used suddenly, you may fall over. Please ride carefully.

| 2.Light/horn button | 5.Power adjustment | 8.Throttle | 11.Electric assist gear |
| 3.Horn | 6.Thumb shifter | 9.Battery Level | 12.Odometer |

(Note: When not used for 10 minutes, the bike is shut down automatically when the bike is stationary.)

13.Battery charging port
(located below the saddle)

14.On/Off button
(Once it's on, the tail light will turn on as well.)

15.Pedal

16.Left

17.Right

Use a 15mm spanner to screw the pedal spindle into the threaded hole and tighten it in the direction of the arrow (left counterclockwise, right and clockwise, as shown).

(Note:When installing the pedal, be aware of the left and right, align the installation horizontally to prevent 6.the pedal from slipping out of the crank)

3. Installation instructions

1. Unfold the D11 bike frame to straightened position and tighten the frame folding handle and safety clasp.
2. Unfold the handle bar tube to the upper position, lock the raised tube into position, and tighten the safety clasp. Adjust the T-handle bar into riding position
3. To insert the seatpost clamp into position, first open the seatpost clamp located on the bike frame, then insert the seatpost and adjust the tube into position (note the marked lines on the seatpost). Adjust the bike seat height until you find the perfect riding position, then tighten the seatpost clamp to lock into position.

4. For your safety, double check the following items are in position before riding: Frame/seat/handle tube locking positions, brake system function, tires inflated, battery charge, and your safety gear.
5. Enjoy your D11 and have a fun ride on the world's best electric bike.

Note: Both the Rise and the Seat Tube are marked with a safe (MAX or MIN). For safety reasons, please use them in a safe range.

5. Specifications

Name	Specification
Electric Bike System	FIIDO System
Electric Motorcycle	Support
Power Assist System	Support
Max Load weight	120kg
Maximum Speed	25km/h
Maximum Range	Power assisted model up to 80-100KM
Battery	High quality lion battery 36V 11.6Ah
Battery adaptation	DC 42V 2A
Recharge Time	7 hours
Display	LCD Display
Drive Type	Rear Drive
Frame Material	Aluminum Alloy
Front Brake	Mechanical Disc Brakes
Brake Type	Mechanical Disc Brakes
Chainset	Prowheel Steel 52 Tooth
Gears	Shimano 7-speed gear
Chain	KMC Z7
Rear Brake	Mechanical Disc Brakes
Rear Hub/Rated Power	XiongDa Motor/250W
Rims	Alloy
Wheel Size	20"
Tyre Size	20" × 1.75 inch
Tyres	Cheng Shin Tire
Net Weight	17.5kg(with battery)
Unfold size	148cm×57cm×110m
Folding size	80cm x 74cm x 40cm
